InnovaX 1.0

Sabaragamuwa University
IEEE Computer Society

- The IEEE Computer Society Chapter of SUSL is a student-driven community committed to fostering technology, innovation, and knowledge. We bring together passionate individuals who are eager to learn, create, and explore the ever-evolving world of computing and technology.

- Through events, workshops, competitions, and collaborative initiatives, we create opportunities for students to develop their skills, exchange ideas, and transform creativity into meaningful solutions. Our goal is to inspire the next generation of innovators to think beyond boundaries and create an impact through technology.

What Is InnovaX 1.0?

- InnovaX 1.0 is an Agentic AI Competition that challenges undergraduate students to think beyond conventional solutions and explore the possibilities of Agentic AI.
- Participants will identify real-world problems, develop innovative ideas, and transform them into meaningful solutions through creativity, collaboration, and technology.

What Is an AI Agent?

- An AI agent is a system that uses reasoning to understand information, decide what to do, use tools, and improve its next action based on the results.

How Does an AI Agent Work?

- **Perceives:** Collects information from sources such as files, APIs, sensors, or the web.
- **Decides:** Uses AI reasoning to choose the most suitable next action.
- **Acts:** Uses tools such as APIs, databases, or devices to perform tasks.
- **Loops:** Uses the results of its actions to decide what to do next.

Competition Domains

- **Domain A: Smart Environment & Physical Systems**
  Environmental monitoring, disaster alerts, smart agriculture, and predictive maintenance.
- **Domain B: Education & Human Capability**
  Personalized learning, research assistants, accessibility, and Sinhala/Tamil learning support.
- **Domain C: Civic Services & Community Wellbeing**
  Government services, financial inclusion, health information, and small-business support.

Any suitable AI tools, models, frameworks, databases, or development technologies are allowed. Hardware is optional.
Sinhala and Tamil language support can earn an additional 10 bonus points in any domain.

Technical Policies & Guidelines

- **Allowed:** Any suitable AI models, agent frameworks, APIs, databases, interfaces, and Domain A hardware.

- **Conditions:**
  - No-code/low-code tools are allowed in Phase 1. In Phases 2 and 3, teams must explain and modify their agent's decision loop.
  - Understand and explain every component.

- **Not Permitted:**
  - Existing products or previous projects without a clearly explained novel contribution.
  - Irreversible actions without human confirmation.
  - Unauthorized scraping or use of personal, proprietary, or confidential data.

InnovaX 1.0

Competition Overview

PHASE 01 — IDEA SUBMISSION
Identify a real problem, propose an agent-based solution, and explain why an AI agent is appropriate.

PHASE 02 — PROTOTYPE DEVELOPMENT
Build a working prototype that demonstrates the agent's reasoning, tool use, and decision loop.

PHASE 03 — GRAND FINALE
Present your solution, demonstrate its capabilities, and answer questions from the judges.

Phase 1: Idea Submission

- **Your mission:** Identify a specific real-world problem and propose an innovative AI agent to solve it.

- **Required Deliverables**
- Project proposal (template will be provided).

- **Your proposal should cover:** The problem, proposed solution, expected impact, why an AI agent is needed, how it works, feasibility, data sources, and responsible AI.

- **Key Advice:** Focus on the problem, solution value, and why an AI agent is better than a simple chatbot.

Phase 2: Prototype Development

- **Your mission:** Build a working AI agent prototype that demonstrates its complete decision-making process.

- **Required Deliverables**

- Runnable source-code repository and README.
- 10-minute demonstration video.
- Status report covering working, mocked, and failed features.

- **What to Include in the Demo Video**

- Introduce the real-world problem and target users.
- Demonstrate the working software and its main features.
- Show how the AI agent identifies and addresses the problem.
- Demonstrate the agent's reasoning, tool usage, and decision-making loop.
- Show the results and explain any limitations or mocked features.

Phase 3: Grand Finale

- Each selected Top 10 team must participate in person at the Grand Finale.

- **Each team gets a 15-minute presentation slot:**
  - 10 minutes: Project pitch and Live prototype demo.
  - 5 minutes: Judges' Q&A.

- **Be Prepared to Explain:** The problem, target users, impact, agent architecture, technical implementation, data sources, limitations, costs, and safety measures.

- **Important:** Prepare a backup demo video in case the live demo fails. Using it may reduce your demo score but will not disqualify your team.

InnovaX 1.0

Event Timeline

OCT 12, 2026	Participant Registration Opens
OCT 20, 2026	Registration Closes
OCT 26, 2026	Proposal Submission Opens
NOV 04, 2026	Proposal Submission Deadline
NOV 15, 2026	Proposal Winners Announced
NOV 16, 2026	Prototype Submission Opens
NOV 26, 2026	Prototype Submission Deadline
DEC 06, 2026	Top 10 Teams Announced
DEC 12, 2026	Grand Finale

Rules & Regulations

All participants are required to read and understand the official rules and regulations before participating in InnovaX 1.0.

- Open to all university undergraduate students.
- Participants may compete in teams of 1–3 members.
- All submitted ideas and solutions must be original and free from plagiarism.
- Participants may use Agentic AI and other technologies in accordance with the competition guidelines.
- All submissions must be completed in the specified format and before the given deadlines.
- Properly acknowledge any third-party resources or assets used.
- Participants must maintain professional and respectful conduct throughout the competition.
- Judges' decisions are final.
- Violation of the rules may result in disqualification.

InnovaX 1.0

Cash Prize

2ND PLACE
LKR 20,000

1ST PLACE
LKR 30,000

3RD PLACE
LKR 10,000

Each winning team will receive a certificate of achievement and a cash prize.
All participants will be awarded an e-certificate for their participation.
